"Rimini" lamp set with mosaic

Instructions No. 956

This Lampshade is easy to make and provides your home with a fantastic light. Through the transparent mosaics the light refracts in different colours and provides a pleasant brightness. You will be surprised how effectively the small stones can be processed.

And it is as simple as that:

Stick the mosaic with the effect - Glue on the Lampshade. The effect - Glue has the advantage that it dries transparent. Pay attention to the edge guide. You can use a pair of tweezers to place the mosaic exactly. Then assemble your lamp.
