

Advent candles in pastel

Instructions No. 2068

Difficulty: Advanced 🍴🍴🍴🍴

Working time: 3 Hours

Make yourself really cozy **during the Advent season** and create beautiful romantic **Advent candles**. In combination with a self-cast concrete slab and borders made from wax for candles , you can create an eye-catcher for your four walls.

This is how the base plate and candles are designed:

First spray the **mold** with baking spray. Mix 30 tablespoons of concrete with water to form a creamy mixture and pour it into the "Candle decoration plate" **mold**. Tap the mold lightly on the surface several times so that the air bubbles rise. Leave the plate to dry for 24 hours. Then carefully turn the mold over and remove the casting. The edges can be finished with sandpaper .

Apply some of the **candle liner** to the **decorative mats**. Use a spatula to spread the mixture over the entire mold. After 24 hours Time to dry: you can carefully remove the solid mass from the decorative mat. You can dab the candles with Candle Liner or **Inka gold** as desired. You can also accentuate the wax borders with Maya Stardust. Then place them around the candles and press lightly. You can write numbers on the foil balls with the Candle Linder and fix them to the decor plate with hot glue.
