Angel Lumiel

Instructions No. 1502

Difficulty: Beginner

Working time: 30 Minutes

You can easily recreate this **bright winter decoration** . The angels belong in every winter and **Christmas decoration.** They are a great eye-catcher in the home and also cut **a** fine figure as **lucky** and guardian angels.

Whitee Christmas angel

Print the **motif templates** at the beginning of your work. Then start to transfer the templates of the cones to the star foil and the wing templates to Foam sheets . Now cut out the motif templates.

Next, stick an equally long strip of double-sided Adhesive tape. to each straight side of the cut-out star foil. Please note that the smooth side of the foil must face inwards to achieve the 3D star effect. Remove the protective strip of the adhesive tape, turn the star foil into a cone and stick the straight sides together to form a cone. Repeat this procedure for the second star foil section.

Now it is already the turn of the **angels** ' heads. First cut a strand of the **Chenille wire** each in two halves of equal length. Twist the ends of the chenille wire pieces together over a length of about 5 - 6 cm. The resulting ring at the upper end is later **bent** into a **halo** .

Bright dress & featherlight Angel wings

Insert the twisted end through the **Wooden ball**. Then thread a small piece of the light chain **from** below through the first cone and fix it to the lower end of the head with chenille wire. Pull the light chain back into the body cone until the head is on top of the cone. Now take the second part of the chenille wire and wrap it around the top of the cone like a scarf. This serves as an accessory, but also as an additional stabilisation for the head. If necessary, you can

use a few drops of **hot glue** to fix the head more stable on the body.

Do the same with the second strand Chenille wire. If the head is sitting on the correct Position, ..we'll get the **wings** . You have already cut these out of Foam sheets before. Now remove the protective foil from the self-adhesive Foam sheets and start to stick the Feathers to the Foam sheets as desired. The feather effect is most beautiful if you put the keels of the **Feathers** center on the back piece of the foam rubber. Then glue the Foam sheets to the angel body with a few drops of hot glue.

Please repeat the corresponding steps for your second winter angel. Now you still have to align the heads of the angels at only and bend the halos to the right shape. Ready is your **heavenly shining winter angel!**

Must Have

VBS Star foil "Magic Star"

Length: 50 cm
Width: 50 cm
Thickness: 0.2 mm
Material: Plastic

110,69 Kč (1 m2 = 442,76 Kč)
