Batik Shirts

Instructions No. 2418

Difficulty: Beginner

Working time: 1 hour

Give old or new garments a new and individual colourful look with the well-known batik technique. By folding, tying, knotting, twisting and winding the textiles, a wide variety of designs are created during the dyeing process. This is how unique, one-of-a-kind garments are created.

This is how true designer pieces are created:

First, protect your workspace with a waterproof pad and wear disposable gloves while batik.

Wash your textile without fabric softener before dyeing.

Place the wet shirt on your protected workspace. Grasp the fabric at one point and twist it in. Then tie the fabric together like a flower.

Shake the fabric dye well and dye the individual segments with different colours. First dye one side and then the other.

Let the T-shirt dry lying down.

Finally, cut the ribbons and iron the T-shirt to fix the colour.

Must Have

Kids t-shirt, white, Clothing Size 164

Size: 164
Grammage: 145 g/m²

123,59 Kč
