Fire Painting Wooden Chest

Instructions No. 230

Difficulty: Advanced

Working time: 1 hour

It Wooden burning was originally used quite practically for marking private property. But it can do much more! With a little practice and a sure instinct, filigree patterns and lettering are created, which turn a simple blank into an unusual unique specimen. The extraordinary look is not achieved with any other technique, which is why it is so interesting and still up-to-date today.

That's how it's done:

Copy the motif template to the desired size and use graphite paper to transfer the motif to the chest. Put an ornament of individual motifs together on the lid. Draw the motifs with the branding pen.

Work out the borders around the motifs, the edges and bars with a fine tip of the Brandmal-Pen. Once all contours and surfaces have been created as desired with Wooden burning , design the wooden chest according to your own taste with coloured Wood stain .

Finally wipe over the wood with Ink Pads . This gives the object "that certain something".

Must Have

VBS Chest with insert

Depth: 18 cm
Width: 28.5 cm
Height: 13.5 cm
Material: Raw wood
