Card design for school enrollment

Instructions No. 3298

Difficulty: Beginner

Working time: 2 Hours

The start of school is a very special event for children, family and friends alike. Do you need an idea for unique self-designed cards for this occasion? Our idea is suitable for invitations to the party, as a greeting card and also as name cards for the teachers. Let us inspire you and design your own personalized school enrolment cards.

1. Create the basis: Prepare the card

First, choose a paper color that will form the base of your card. Cut the Paper slightly smaller than the card itself and stick it onto the card using 3D-glue pads . This makes it look particularly three-dimensional.

2. **Create pens from Paper**

With the VBS Contour cutter, you can easily and accurately cut 2 cm wide strips from colored coloured paper and brown kraft paper .
The colored strips will make up the pencils you have made: Lay them next to each other at different lengths so that the edges form a line at one end of the strip. Attach the kraft paper strip 1 cm below this (imaginary) line across it. This represents the "wooden sheathing" of the individual pegs.
Cut the individual strips apart again and cut a point at the end of each strip covered with kraft paper . Round off the opposite corners and you have a pencil shape. Stick the pencils you have made onto the card.

3. **Stamp messages and set the scene**
Choose a silicone stamp of your choice and place it on a clear stamp holder. Press the stamp firmly into the stamping ink and then stamp a strip of kraft paper with firm pressure.
Extra tip: After stamping, you should clean the stamp with a special stamp cleaner so that it is ready for your next craft project.
Cut the stamped paper strips into an interesting shape and attach it to your card using 3D-glue pads .

4. **Envelope design**
Decorate the envelope of your DIY Card using the same techniques. Decorate it with paper pens and stamps you have made yourself. This will make the card and envelope match perfectly.

Conclusion: Get creative and order your materials today!
You can find all the materials you need here or in our online store, so go ahead - order now, enjoy the crafting time and the pleasure of your finished cards later!
