Concrete gnome with leaf metal

Instructions No. 2301

Difficulty: Beginner

Working time: 2 Hours

These cute winter gnomes were moulded from concrete modelling clay and finished with leaf metal. You too can create this elegant Christmas decoration in just a few hours.

Knead the concrete modelling mix until it is soft. Take a piece of the concrete paste and mould it around a pile of polystamide. Use the modelling tool to smooth the surface. Leave to dry for several hours.

When dry, coat the tips, which represent the caps, with application milk and cover them with leaf metal. For protection, apply a coat of overlay varnish afterwards.

For the beard and hair, apply decorative snow with a spatula. Leave to dry. Finally, paint on eyes, light reflections and mouths with craft paint using a bamboo skewer.

Find out how easy it is to use leaf metal in our illustrative video:

Must Have

Concrete modeling clay, gray, 500 g

Air-drying
Weight: 500 g

128,79 Kč (1 kg = 257,58 Kč)
