Craft game idea throwing rings

Instructions No. 2997

Difficulty: Beginner

Working time: 1 hour 30 Minutes

With this diy idea throwing rings, you can combine the best leisure activities: first crafting and making, then enjoying the fun with friends: The aim is to score as many points as possible throwing rings.

This is how you create the throwing game:

Make the throwing cross from three 1 m long square wooden strips, each 10 x 10 mm thick. Cut 1 square strip in half using the mitre cutting set. Glue these two pieces to the 1 m long wooden strip with wood glue to form a cross. Saw another one with a 90% miter into 4 equal pieces and glue these into the cross as cross struts.

Starting from the center of the wooden cross, draw markings at regular intervals and drill small holes at these points. The "target round bars" will be fixed into these later.

Prime the wood with white paint, then paint the ends of the round sticks and the corresponding wooden numbers (for later scoring). Fix the sticks in the pre-drilled holes with glue and glue the corresponding numerical values to them.

Depending on the level of difficulty, you can use different sized throwing rings or, as in this case, rings with Ø 15 or Ø 20 cm.

The finished game is also ideal for playing with children or as party fun!
