creative set "Leather flowers-ear hole stud"

Instructions No. 1133

Difficulty: Beginner

You love individual earrings? Now you can easily design your own piece of jewellery
Whether for yourself or as a gift - these earrings are quickly self-made. Treat yourself to a pretty accessory for everyday use or discreet jewellery for special occasions

And it's that easy:

How do I design the earrings myself?

Put the Ear hole stud ready and give a little Jewellery glue on the Plugs. Glue the leather flower in the color of your choice on the Plugs. Afterwards only is still missing the wax pearl, which must be stuck on the flower. For this, grab the Pearl carefully with tweezers and fix it also with a little Jewellery glue on the flower. Then you should let everything dry well.

Useful tips for making earrings:
- Use tweezers to touch the beads
- do not apply too much hot glue, otherwise the glue will visibly swell
- let everything dry out well so that nothing slips
