Cushion with button appliqués

Instructions No. 645

Difficulty: Advanced

Working time: 45 Minutes

On this cuddly cushion, buttons in delicate pastel colours "bloom" on a filigree branch. This is drawn out and then embroidered with a simple stem stitch. This is very easy.

Here's **how it works**

Use a line-ex pen to sketch a **branch** on the cushion cover and test the buttons. Then embroider the drawn lines with the brown Embroidery twist in stem stitch.

Put the **buttons** back on and fix them slightly with lightning adhesive gel. The easiest way is to use tweezers. In this case it is important that no lightning bolt glue gets into the buttonholes. Then sew on the buttons with white sewing thread and also sew large and small buttons on top of each other.

Sketch leaves between the branches with a line-ex pen and embroider with green Embroidery twist in stem stitch.

Fix the **lace** with Pins to the edges of the cushion cover and sew on by hand or machine. Alternatively, the lace can also be fixed with hot glue.

The finished decorated cushion cover must now be **filled** only with an inlet.

Must Have

Cushion cover, White

Length: 39 cm
Width: 39 cm
