A DIY-Project that is not only only fun, but also gives your home a personal touch. Thanks to the flexible design options, there are no limits to your creativity. Read further and find out how you can create your own individual frame in just a few simple steps!

Make your own frame from craft blocks: Your creative DIY-Instructions

Step 1: Create the base

To shape your frame, glue the craft blocks into a square or rectangle. To do this, use the VBS handicraft glue. Make sure that you fit the blocks close together to ensure stability. Allow the glue to dry thoroughly before continuing. This will prevent the construction from shifting.

Step 2: Prepare the back wall

Once the frame has dried, it's time to cut the back panel to size. Place the frame on the desired cardboard of the Paper and outline it with a pencil. This will ensure that the back panel is the exact size.

Step 3: Attach the cardboard

Then cut out the outline you have drawn from the cardboard. Make sure the edges are clean so that everything fits perfectly. Then glue the cardboard to the back of the craft block frame with the patterned side facing inwards.

Step 4: The finishing touches

Do you want to hang up your frame? Then you can now attach picture eyelets to the back. Screw them in carefully so that the frame hangs securely on the wall later.

Completion

Your unique frame is now ready for use! Whether for photos, pictures or flowers - your home-made work of art is guaranteed to attract everyone's attention.
