Keramik-Osterei mit Kerze

Instructions No. 1574

Difficulty: Advanced

Working time: 40 Minutes

Give away a surprise egg of a special kind for Easter - the ceramic egg gets a great look through Napkin technique , the candle poured into the egg is also a shining eye-catcher.

The noble ceramic egg is first of all **Napkin technique** designed. For this, the napkin motif to be applied to the egg is cut out of Napkin . The lower layers Paper are removed from napkin cut, so that only still has the printed paper layer left.

The ceramic egg is coated with Napkin varnish , the napkin motif is carefully laid on and then another layer of Napkin varnish is applied. After drying, any napkin paper protruding from the edge can be cut off with scissors or a scalpel.

Extra tip
Handicraft paint, which has been adjusted to the background colour of Napkin , can be used for small repairs on the motif.

How the ceramic egg becomes a candle

First a wick is placed in the ceramic egg. Then Wax for candles is heated to approx. 60 ° C in a heat-resistant container. The liquid Wax for candles is then poured into the ceramic egg. Our basic instructions for candle casting will give you more information on how this crafting technique works. As soon as the wax has solidified, the ceramic egg is ready to be given as a gift.

Must Have

VBS Ceramic egg, divisible

Number of parts: 2
Diameter (outside): 11 cm
Height: 15 cm
Material: Ceramics
