lavender-Pouring soaps

Instructions No. 2866

Difficulty: Beginner

Working time: 2 Hours

Pour gorgeous smelling lavender soaps. These look beautiful and also give off the pleasant lavender scent. Beautifully packaged, the soaps are also a great gift idea.

You will need approx. 60 g casting soap per bar of soap.

Heat this in a melting pot or alternatively in a melting ladle over a water bath. Add soap colour, fragrance oil, skincare argan oil, cosmetic emulsifier and lavender flowers to the melted soap as desired.

Pour the mixture into the mold and leave to harden. After approx. 4-5 hours, you can carefully remove the soap from the mold.

Coat the wooden soap dish with wood stain . After drying, smooth out the protruding wood fibers with sandpaper . Then coat the shelf with aqua varnish. This protects the wood from moisture.

Cut two 4 cm wide strips from the natural paper and place them around the soap bars.
Place one or more lavender flowers on the band and tie it to the soap with warp yarn .
