Light decoration with paper silhouette

Instructions No. 2658

Difficulty: Beginner

Working time: 3 Hours

The luminous picture is easy to recreate even for inexperienced hobbyists. With the fir trees, game and houses, it brings a cozy warmth to your home with the warm light.

How to create the luminous image

First paint the cardboard frame with gold paint. Then design the paper silhouette with craft paints.

You can create motifs of 18.5 cm in height in the frame, but when cutting your piece of paper silhouette, include 1 cm more for a gluing edge and then cut out corresponding parts from the Long Silhouette.

The 3D look of this image is created by crafting silhouette pieces in three different heights, one behind the other:

Extend the middle and back pieces accordingly each with glued white clay cardboard. Then glue all three silhouette pieces behind each other with double-sided tape and then into the cardboard frame.

Illumination

For the lighting, first cover the entire back of the frame with Magic Star foil. Then attach the string of lights to the back of the frame. Bend the individual lights into shape so that you achieve a particularly beautiful star effect in the lighting.
