Macramé hanging basket

Instructions No. 1971

Difficulty: Beginner

Working time: 2 Hours

The Macramé technique is often used to knot small pieces of jewelry such as bracelets. But also big decorations for your home can be realized with this technique. Learn in this instruction how to make a practical hanging basket with two compartments.

Here's how it works:

Cut **25x 80 cm long in Cordsthe** colour for the **small floor**. Take them Cords together in the middle, thread them through one hole of the floor each and make a knot. Now lead out of each hole 2 tape ends of 40 cm each. Download the **free knotting instructions** and start knotting

Important: At the end of the first round, two individual tapes will be left because the rattan tube bottom has an odd number of holes. Simply knot these straps together and cut them off close to the knot. With a little **Handicraft glue** the node can be fixed additionally. After you have tied five rows, the ends of the cords are knotted to a small bamboo ring and cut off. Again, the knots are secured with **glue**

For the **big bottom** you need 33x 100 cm. **ProceeCordsd** as described Yellow. above

Cut **12x 80 cm** of the yellow **Cord** take 3 threads together and knot each of them on four sides of the ring **from big basket. 25 cm** above this the cords are **knotted** to the ring of the small **basket**. Now take all threads

together and make a knot. If necessary, cut the protruding ends to size.

In the finished hanging basket a wide variety of things find their place. How about in the kitchen, for example, from storage space for fruit and vegetables? Or in the children's room for small toys and cuddly toys. But also handicraft items such as wool and crochet or Knitting needles can be excellently stored in the baskets.

Must Have

Jute cord "Basic", Berry

Length: 50 m
Width: 2 mm

128,79 Kč (1 m = 2,58 Kč)
