Making paper flowers outdoors

Instructions No. 3376

Difficulty: Beginner

Working time: 4 Hours

Are you looking for an unusual decoration for your home? This homemade flower wreath is also suitable for outdoor decorations as it is made from color-fast silk paper . The hand-folded blossoms and colorful pompoms make cheerful paper flowers for a garden party or as a cheerful decoration for every day.

Magical flower wreath: your instructions for an enchanting decoration

Start by transferring the flower template to the color-solid silk paper . Mirror the template on the dotted line. You will then have two petals as a pair on a Paper in front of you.

transfer as many flower shapes as you need for the number of flowers.
The metal ring forms the basis for a flower wreath. For large wreaths, use a total of 27 pairs of petals, while 26 pairs of petals are sufficient for smaller wreaths.

Start by placing a pair of petals around the metal ring and tying them tightly to the ring with a firm ribbon . This not only fixes the Paper in place only but also gathers it into puffy petals. Attach the remaining petals to the metal ring in the same way. When tying, make sure that the flowers are evenly distributed and completely surround the ring.

In the next step, glue colorful pompoms to the flowers on the ring. This makes the flowers look particularly colorful and also gives them a clean look.

Finally, attach a hanging ribbon. Choose a sturdy and suitable ribbon, that harmonizes well with the design of your wreath and tie it to the metal ring. Now your flower wreath is ready to be hung up and decorate your walls.

Experience the joy of crafting and discover a world of possibilities to express your creativity! You can purchase all the craft materials you need for this idea in our online store.

Must Have

Aquarola silk paper, colourfast, Yellow

Grammage: 20 g/m²
