Maritime decoration with dried flowers

Instructions No. 2211

Difficulty: Beginner

Working time: 3 Hours

This dreamlike decoration with dried flowers brings a coastal feeling into your home. As a wall decoration or even as a door wreath, the metal ring with maritime grasses and pendants really makes a statement.

1. Tie several small bouquets of different dried flowers. Tie them together with warp yarn.

2. Knot the bouquets all around the metal ring.

3. Cut a cotton rope so that it is slightly larger than the metal ring. Tie the intersections together with warp yarn so that the ends do not come undone.

4. Place the two ends of the cotton rope on top of each other, wrap the warp yarn around them and shape them into a circle.

5. Place the dried flower wreath on the cotton rope and tie with warp yarn.

6. Hang the scatter pieces in the centre of the wreath with warp yarn.
