moravian stars on wreath and card

Instructions No. 2897

Difficulty: Beginner

Working time: 4 Hours

Moravian stars are beautiful and can be made in different ways so that they can be glued onto a card and a ring. A great decoration for the Christmas season!

This is how the card and wreath are made:

Fold the **Fröbel stars** according to the instructions. Six stars have a flat back so that they can be glued on. The hanging Fröbel star in the ring has the 3D shape on both sides lace.

Stick one of the stars onto the **card** and decorate it discreetly as you wish with the **Gelly Roll pens**.

Decorate the **wooden ring** with the remaining Froebel stars and the **wooden letters**, which you paint with white handicraft paint beforehand. Glue these into the ring using hot glue.

Next, cut off a piece of the wire. Thread it into a sewing needle and push it vertically through the star. At the bottom, first string a 6 mm wooden bead and then a 4 mm wooden bead. Fold the wire once and pull it through the

6 mm wooden bead again. Twist the end. Now you can string the three 4 mm beads on top. Tie the end of the wire to the top of the wooden ring.
