Secret Santa from felt

Instructions No. 1671

Difficulty: Beginner

Working time: 30 Minutes

Create two funny fellows who will beautify your home.
With our templates you can create two different sized dwarves. The small gnome is 28 cm tall and the large gnome is 40 cm tall.

Preparation

Prepare the **wooden stand for** the gnome. To do this, glue the Plugs into the wooden plate

Now download the **motif template** for the respective gnome and transfer it as space-saving as possible to Textile felt. You have to transfer the body of the gnome twice to the grey Felt . To do this, cut out the templates, place them on the corresponding Felt and then paint **around** the outer lines, for example with a soft pencil or line-ex pencil.

Then cut out the individual pieces from Felt and glue them together using hot glue **as follows** : First you should glue the grey bodies together, into which the felt stand will later be inserted. Here it is recommended to apply a thin layer of glue to the outer edge of the Felt .

Then place the beard and glue it on. Then place the nose on the beard and above it the red cap. For decoration you can then glue the stars onto the cap.

Extra tip: You can make the gnomes in two different sizes. You can decide which size you like best or you can place a big and a small gnome together - so you have a funny pair of gnomes.
