# Stylish Pendants from Jewellery Concrete

**Instructions No. 1568**

Difficulty: Beginner

Working time: 20 Minutes

You can cast your own pendants very quickly. Discover here how easy it is to do this and be inspired by the many different designs.

## Pendants cast

Stir the decorative concrete according to the product instructions

Pour the mass into the pendant form

The casting compound can be removed from the mould after about half a day. Correctly hardened and thus robust enough for further processing, the cast jewelry pendant is ready after about 24 hours.

**Casting compound touch,..**

**... ...just pour it into the mold and...**

## . .Pendants take from

## Individual design

Not only the different casting moulds allow to **design** pendants very **personal.** Paint the pendants with Metallic Paint, with chalky paint or glue a part of the pendant with wood veneer or cork.

The hole for the pendant, which is cast at the same time, can be easily fitted with a **leather strap or** a metal chain and a small metal accssoire can be tied in **front of the** concrete pendant according to your personal taste.

# Must Have

## Jewellery Concrete

Weight: 300 g

**146,89 Kč** (1 kg = 489,63 Kč)
