Tableau mixed media Casa Granada

Instructions No. 2514

Difficulty: Advanced

Working time: 6 Hours

Mixed media stands for a work of art that has been created using different materials and techniques. In our example, we create a beautiful **window scene** on a stretcher frame. The finished picture is a jewel on your wall.

This is how stretched canvas is designed:

Glue the **straw silk** to the **stretcher** with the **Colla Velo**. After drying, match the rest of the picture to the motif with the **acrylic paints**.

Use the stencil and the white **crackle paste** to add special accents. These parts are also colour-matched after drying.

Apply a thick coat of the transparent **Glossy Gel** to the entire window section and allow to dry thoroughly. Cut out the corresponding window motif from the motif block, coat it with the matt varnish and, after drying, curve it slightly on the sides for a great 3D effect. Coat the "glass parts" of the motif with the transparent crackle paste for a real window look.

Glue the window onto the part of the stretcher that has been padded with Glossy Gel.

Mix the **Ceramic Powder** according to the instructions on the packet and pour it into the **mould**. When dry, dab with acrylic colours and accentuate a little with **Patina anticante** or **Cerantica metallic**.

Glue onto the stretcher.

Cut out tags from the motif block, also paint them with the matt varnish and then paint the edges with **Patina anticante** and **Cerantica metallic**. Punch holes and thread a metallic cord through them. Apply the tags with 3D adhesive pads, run the strings over the upper edge of the stretcher frame and glue them to the back.
