Underwater world made of paper

Instructions No. 2725

Difficulty: Beginner

Working time: 3 Hours

According to the motto "Punch, stamp, cut & glue" you can create your own underwater world - great fun for the whole family.

Crafting a colourful underwater world

First, design the stretcher frame and thus the underwater world. To do this, first prime the stretcher with black paint - while this is drying, you can now start cutting out the individual backgrounds from the VBS linen cardboard in different colours.

To give the picture more depth, simply use our 3D adhesive pads to glue it on.

The inhabitants of the underwater world are created from various punching templates, silicone stamps and coloured paper. These are then simply glued on with VBS craft glue No. 182. You can give free rein to your creativity when arranging them.
