Wedding table decoration with cast letters

Instructions No. 3208

Difficulty: Beginner

Working time: 1 hour

Welcome to your new creative craft idea for your wedding table decorations. Individual letters made from casting powder are the perfect addition to your table decorations. They are a real eye-catcher and are very easy to make yourself. Follow these short instructions and create your own personal highlights for your celebration.

Step 1: Casting the letters

Mix the casting powder with water until you have a creamy mixture. Pour this into the molds provided. To avoid unsightly air bubbles, tap the filled mold lightly on a firm surface several times.

Step 2: Drying and finishing

Leave the filled molds to dry for about hour . Then carefully press the letters out of the molds. If there are any sharp

edges, you can easily smooth them out with a little sandpaper .

Step 3: Creative decoration

Place the dried letters on your bark slice. If necessary, fix them in place with a little handicraft glue. Use eucalyptus leaves and decorative sprinkles to create an individual look. Use craft glue or hot glue to attach the scatter decoration to the birch slices and then attach everything to the bark slice.

Tip for individual design

For a particularly individual touch, you can color the casting powder with VBS colour concentrate in the colors of your choice. This way, you can perfectly adapt your decorative elements to any wedding theme and also use them as decorations for other celebrations.

Must Have

Silicone casting mould "A-Z"

Motif size: 5.5 cm
Number of motifs: 26
Fill volume: 750 ml
Length: 34 cm
Width: 22.5 cm
