Winter penguin made of wood

Instructions No. 918

This penguin feels comfortable even in the warmth. This wooden figure can be beautifully decorated with colours and because of the already existing cut-outs for the fairy lights, it provides a real point of light in the wintertime.

And it's as simple as that:

Prime your stomach and face in white. Prime the penguin foot in black. When the paint has dried, trace the contours with your marker pen and fill the areas with the appropriate colour
Mix some of the Black into the white and you will get a Grey, which you can use to accentuate the penguin with the Paint sponge
Then glue the fairy lights with hot glue in the holes provided and put the penguin up.
