# Wire cacti craft

**Instructions No. 1608**

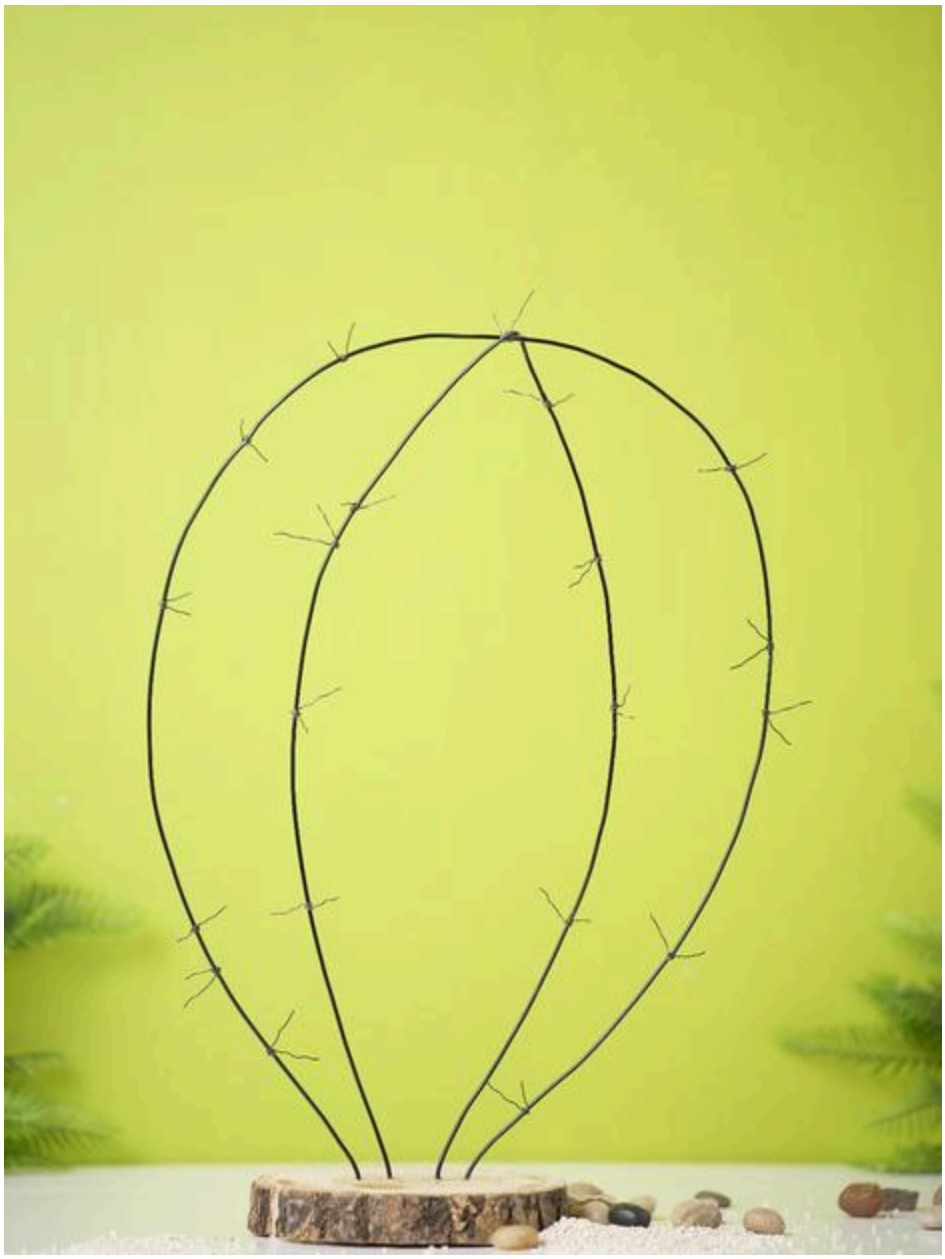

Difficulty: Beginner

Working time: 1 hour

Our **wire cacti** do not make only a **good figure**, but are also nice summery and an eye-catcher in your home. You can illuminate the cactuses additionally or **use** them as note holders.

Bend the **decorative aluminium wire** into cacti. You can use our shapes or you can form your own creations

Now place the **formed cacti** on the **tree discs** and mark the places where the **holes** have to be **drilled**. Take the tree discs and **drill** two or four **holes with** the cordless drill into the **Wooden discs**.
Please make sure that the diameter of the drill head corresponds with the diameter of the wire, so that the cactus holds properly.

We have **wrapped** a cactus with a **micro-LED light chain**, so you still have an atmospheric eye-catcher.

The **spines** of the other two cacti can be **made** with winding wire. To do this, wrap the wire in the desired places and press **the** wire tightly against the cacti with the help of a pair of **jewellery pliers**

For help you can also use some **Handicraft glue** and fix the spikes to the wire. This wire dries transparent, so that it is not visible later.

**Tip:** If you like, you can also **use** the cacti as note holders. For this purpose, notes etc. can be attached **to** the cactus with small clips.

## Must Have

### Decorative aluminium wire, 2 mm, Black

Length: 2 m
Diameter (outside): 2 mm
Material: Aluminium

**66,89 Kč** (1 m = 33,45 Kč)
